Policy document on green campus:

A Green Campus is where environmentally friendly practices and education combine to promote sustainable and eco-friendly practices. The green campus concept offers an institution the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to the environmental, social, and economic needs of mankind.

GIET School of Pharmacy promotes eco-friendly practices on campus.

Objectives of the policy:

- To promote sound environmental management policies and practices throughout the College.
- To reduce and, where practicable, prevent pollution.
- To adopt targets for improving environmental performance.
- To ensure a sound understanding of current environmental performance.
- To compose students by understanding the importance of the environment and its problem areas.
- To implement green campus initiatives.

Greening the campus is all about sweeping away wasteful inefficiencies and using conventional energy sources for its daily power needs, correct disposal handling, purchase of environment-friendly supplies, and an effective recycling program. The Institute's administration believes everyone must work out time-bound strategies to implement green campus initiatives. These strategies need to be incorporated into the institutional planning and budgeting processes with the aim of developing a clean and green campus. Every individual of GSP will work, may he/she be a student, faculty, or support staff, to foster a culture of self-sustainability and make the entire campus environmentally friendly. The Green Campus Initiatives (GCI) will enable the institution to develop the campus as a living laboratory for innovation.

Awareness and Training

- To communicate internally and externally the College's environmental objectives and performance.
- To raise awareness among the staff and students of the College's environmental impact, activities and performance, and good practice.
- To provide appropriate environmental educational programs for staff and students.
- To encourage and facilitate feedback and suggestions on ensuring good practice.

GIET Institution protects its own environment by implementing its green campus initiatives and maintaining a pollution free green and clean campus. Environment development is its basic work with the educational policies implemented on the campus.
